The name of your pharmacy network is listed above. The Aetna Medicare pharmacy network includes pharmacies that offer standard cost-sharing and pharmacies that offer preferred cost-sharing. Your cost-sharing may be less at pharmacies with preferred cost-sharing. You may go to either type of network pharmacy to receive your covered prescription drugs.

The pharmacy network includes limited lower-cost, preferred pharmacies in **Suburban Arizona, Suburban Illinois, Urban Kansas, Rural Michigan, Urban Michigan, Urban Missouri, and Suburban West Virginia**. The lower costs advertised in our plan materials for these pharmacies may not be available at the pharmacy you use. To find a network pharmacy, or find up-to-date information about our network pharmacies, including whether there are any lower-cost preferred pharmacies in your area, please call Member Services at the number on the back of your member ID card or consult the online *Pharmacy Directory* at AetnaRetireePlans.com.

Members who get “Extra Help” are not required to fill prescriptions at preferred network pharmacies in order to get Low Income Subsidy (LIS) copays.

Every drug on the plan's Drug List is in one of the cost-sharing tiers described below:

- Tier One – Preferred generic drugs: Includes low-cost generic drugs
- Tier Two – Generic drugs: Includes generic drugs
- Tier Three – Preferred brand drugs: Includes preferred brand drugs and some high-cost generic drugs
- Tier Four – Non-preferred drugs: Includes non-preferred brand drugs and some higher-cost generic drugs
- Tier Five – Specialty drugs: Includes high-cost/unique brand and generic drugs

To find out which cost-sharing tier your drug is in, look it up in the plan's Drug List. If your covered drug costs less than the copayment amount listed in the chart, you will pay that lower price for the drug. You pay *either* the full price of the drug *or* the copayment amount, *whichever is lower*.

Your former employer/union/trust provides some additional coverage during the Coverage Gap stage for covered drugs. Your cost share appears in the chart above.

For brand drugs not included in the additional coverage provided by your former employer/union/trust, the Medicare Coverage Gap Discount Program applies. The Medicare Coverage Gap Discount Program provides manufacturer discounts on brand name drugs. You pay 25% of the negotiated price (excluding the dispensing fee and vaccine administration fee, if any) for brand name drugs. Both the amount you pay and the amount discounted by the manufacturer count

toward your out-of-pocket costs as if you had paid them and moves you through the coverage gap.

You also receive some coverage for generic drugs. You pay no more than 25% of the cost for generic drugs and the plan pays the rest. For generic drugs, the amount paid by the plan (75%) does not count toward your out-of-pocket costs. Only the amount you pay counts and moves you through the coverage gap.

You continue paying the discounted price for brand name drugs and no more than 25% of the costs of generic drugs until your yearly out-of-pocket payments reach a maximum amount that Medicare has set. In 2022, that amount is $7,050. Coinsurance-based cost-sharing is applied against the overall cost of the drug, prior to the application of any discounts or benefits.

Catastrophic Coverage Stage: Amount you pay for covered prescription drugs after reaching $7,050 in out-of-pocket prescription drug costs.

Prescription Drug Quantity	All covered prescription drugs
Per prescription or refill	You pay $0 We will pay the rest.

Step Therapy

Your plan includes step therapy. This requirement encourages you to try less costly but just as effective drugs before the plan covers another drug. For example, if Drug A and Drug B treat the same medical condition, the plan may require you to try Drug A first. If Drug A does not work for you, the plan will then cover Drug B.

This Plan Uses the GRP B2 Formulary:

Your plan uses the GRP B2 formulary, which means that only drugs on Aetna's Drug List will be covered under your plan as long as the drug is medically necessary, and the plan rules are followed. Tiers labeled as brand, preferred brand, and non-preferred drug will also include some high-cost generic drugs. Non-preferred copayment levels may apply to some drugs on the Drug List. If it is medically necessary for you to use a prescription drug that is eligible for coverage under the Medicare drug benefit, but is not on our formulary, you can contact Aetna to request a coverage exception. Your doctor must submit a statement supporting your exception request. Review the *Aetna Medicare 2022 Group Formulary (List of Covered Drugs)* for more information.

Non-Part D Supplemental Benefit

Your former employer/union/trust has purchased additional coverage for some prescription drugs not normally covered in a Medicare prescription drug plan, including the following:

- Drugs when used for the relief of cough or cold symptoms
- Prescription vitamin and mineral products (except prenatal vitamins and fluoride preparations)
- Drugs when used for the treatment of erectile dysfunction

The cost share for these drugs is listed in the Initial Coverage Stage table above. See Tier 1 for the generic cost share amount and Tier 3 for the brand cost share amount.

The amount you pay when you fill a prescription for these drugs does not count towards qualifying you for catastrophic coverage. In addition, if you are receiving “Extra Help” from Medicare to pay for your prescriptions, the “Extra Help” will not pay for these drugs.

To find the drugs that are covered under this supplemental benefit, go online to: AetnaMedicare.com/SupplementalBenefitMAPD. This document will also show limitations, such as quantity limits and prior authorization requirements. For more information, call Member Services.
